ABOUT NEIL

Neil Greene brings national-level cybersecurity expertise to executive audiences. As an AI Automation Threat Mitigation Manager in **federal environments** and Founder of **NightFortress**, Neil speaks where security, leadership, and AI strategy intersect.

His approach reframes cybersecurity as a **leadership discipline**, not an IT department function. With over a decade spanning federal infrastructure, enterprise mobility, and AI governance, Neil translates complex risk into clear executive action.

He is the author of *EXPOSED: Inside Risks and the New Architecture of AI Defense* and creator of the NightFortress AI Security Framework, built on four pillars: Governance, Posture, Automation, and Resilience.

WHAT YOUR AUDIENCE LEAVES WITH

- ✓ A clear understanding of why AI has made traditional security models obsolete and what replaces them
- ✓ A practical framework to assess their organization's real exposure across identity, SaaS, cloud, and data
- ✓ Actionable governance steps they can take before leaving the room
- ✓ The language to lead security conversations at the board and C-suite level

SPEAKING TOPICS

KEYNOTE 01

EXPOSED: AI RISK AND THE NEW LEADERSHIP MANDATE

Why traditional enterprise security models fail smaller organizations — and how the NightFortress AI Security Framework offers a modern alternative.

KEYNOTE 02

GOVERNANCE BEFORE TOOLS

How to establish decision rights, usable guardrails, and innovation boundaries without impeding growth.

KEYNOTE 03

VISIBILITY BEFORE CONTROL

Exposing hidden risk across identity, SaaS applications, cloud configuration, and data flows before attackers do.

KEYNOTE 04

RESILIENCE UNDER PRESSURE

Leadership composure, communication structure, and operational stability during disruption and active incidents.

ALSO AVAILABLE · HALF-DAY WORKSHOP

AI Risk Reset

Governance gap mapping · Exposure posture snapshots · Automation friction audits · Resilience readiness scores · 90-day stabilization roadmap
